TRIAL OF LONG-TERM TREATMENT OF MULTIPLE
SCLEROSIS WITH TOLBUTAMIDE. 15 Jan 63, 3p.
Order from SLA \$1.10 63-10905

Trans. of Medizinische Klinik (West Germany) 1962,
v. 57, p. 1016-1017.

DESCRIPTORS: Therapy. *Multiple sclerosis. *Orinase.
Hypoglycemia. Drugs.

Nineteen patients with multiple sclerosis were treated
up to 10 months with tolbutamide, first as bed patients
and then ambulatory. During this long-term treatment
relapses were observed in four patients, after an
initial improvement in neurological symptomatology.
In none of the other cases could a change in the course
of the disease be demonstrated. A relationship be-
tween a disturbance in carbohydrate metabolism, the
course of the disease, and the use of tolbutamide was
not observed.

ON THE THEORY OF THE X-RAY DISTRIBUTION
CURVES FOR LIQUIDS AND AMORPHOUS SUB-
STANCES. [1960] [29]p. 35 refs.
Order from SLA mi\$2.70, ph\$4.80 61-10655

Trans. of Zeitschrift für Physik (West Germany)
1958, v. 150, p. 215-230.

The statistical frequency distribution for liquids and amorphous substances is obtained experimentally, by a Fourier transformation of X-ray scattering intensities. It is impossible to avoid a cut-off effect, which distorts the radiographic distribution curve, so obtained in a characteristic manner. The degree of distortion depends on the magnitude of the statistical deviations of the atom sites in the irradiated volume and on the limit of measurement of the scattering intensity. In order to examine these influences, the equation for scattering intensity in liquids and amorphous substances is derived. The Fourier transform (Physica-Theoretical, TT, v. 5, no. 9) (over)

 TENNERING OF CELLULOSE FIBERS BY HYPOCHLORITE IN DEPENDENCE OF REDOX POTENTIAL, pH AND OF VALUE. [1961?] 5 refs.
 See also 61-14504

Deutsches Forschungsinstitut Textilforschung, (East Germany)
 Chemische Textilforschung, 174 574

The effect of the bleaching action of hypochlorite is dependent on the pH value and of the $HOCl_2$ concentration. The magnitude of both factors is determined by the pH value, so that the practical man has only to adjust the factor and maintain it constant, and determine the measurement and calculation of redox potential and pH value. Vogtländer, G.
 TENSURING OF CELLULOSE FIBERS BY HYPO-
 CHLORITE, IN DEPENDENCE ON REDOX POTEN-
 TIAL, pH AND pH VALUE. [1961?]: 5 refs.
 Available on loan from SLA 61-14504

Trans. of the Inst. of Text. Tech./Inst. of Text. (Germany)
 1961, vol. 10, no. 1, p. 573-574

The bleaching and tensuring action of hypochlorite
 depends on the value of the pH value and of the HOCI
 concentration. The magnitude of both factors is deter-
 mined by the pH value, so that the practical man has
 only to adjust the filter and maintain it constant, and
 can omit the measurement and calculation of redox
 potentials and pH values. (Author)
